

# RPA Hospital Redevelopment

## Construction update 28 April 2025

Excavations are progressing well following the Easter break, with major in-ground infrastructure diversions under way. Essential services, such as main sewer and water conduits, are being diverted to make way for the redevelopment. Within the hospital, we have also commenced works that will connect the existing building to the new East Tower.

## Minimising construction impacts

We are committed to minimising the impact of our works. All construction activities are carried out with the health and safety of the local community and site workers as our top priority, and we endeavour to keep noise, dust and vibration to a minimum.

Where possible, activities are scheduled during approved site hours of Monday to Friday, 7am to 6pm and Saturday, 8am to 5pm. Work may be delayed or rescheduled due to weather or unforeseen circumstances.

Out of hours work will be communicated directly to affected stakeholders, and all activity dates and times remain subject to change. Delivery of construction materials and equipment may also be undertaken out of hours where required due to vehicle size.
